PROFILE

A developer specialised in **React, Next.js, and TypeScript**, with a good understanding of the entire development process, from backend to user interface. What sets me apart as a candidate is my background in teaching. This experience has given me a lot of patience, a big sense of responsibility, the ability to handle challenging situations, and a willingness to roll up my sleeves, take initiative, and get things done.

Please note: I am enrolled in the Swedish Public Employment Service's (Arbetsförmedlingen) Job and Development Guarantee programme. This means that employers may be eligible for a wage subsidy covering **80% of my employment costs for a 12-month period**. Read more about Introductory Employment (Introduktionsjobb) through the Swedish Public Employment Service. The website also includes a calculator where you can estimate the amount of financial support available.

SKILLS

Tech: HTML, CSS, React, Next.js, Material UI, Radix UI, Tailwind CSS, JavaScript, TypeScript

Backend & Databases: Tanstack Query, Hono, REST API, MongoDB, PostgreSQL, Supabase, Neon, MySQL

Other: Jest, Vitest, Sanity CMS, Strapi, Wordpress, Git, GitHub

Languages: Swedish (native language), English (fluent), Spanish (fluent)

WORK EXPERIENCE

Developer – Adcerva, Remote,
April 2026 – Ongoing

- Improving **UX** and responsiveness in Adcerva's own marketing platform by rebuilding components with **Radix UI**, **Tailwind**, **React**, **Next.js**, **TypeScript**, and **Zustand** to solve previous inconsistencies.
- Developing **API** and database integrations in **Hono**, **SQL**, and **TanStack Query**, focusing on reliable data fetching and error handling, where better caching also contributes to improved data flow and fewer unnecessary requests.
- Writing and maintaining tests with **Vitest**, as well as using AI tools such as Claude CLI and CodeRabbit to ensure good code quality.

Developer – Marianco, Remote (part-time)
September 2025 – March 2026

- Restructured **Strapi CMS** and built a product sync between the online store and **PostgreSQL** using **Next.js** and **Node.js**, enabling the team to manage content and products completely independently without help from developers.
- Integrated donation and newsletter platforms (WhyDonate, Zoho) to provide the organization with new digital fundraising channels and direct contact with subscribers.
- Wrote documentation and led online onboarding sessions for new volunteers to help them quickly get started with their work.

Freelance Developer – 3D Print & Konsult, Remote
August 2025 – January 2026

- Rebuilt and maintained the client's website using custom **CSS** and an improved layout, which increased usability and accessibility.

Developer – Appears, Stockholm (fixed-term employment)
January 2025 – April 2025

- Connected user settings to **MongoDB** in Sabina AI (an AI-based recruitment system) to solve the problem of settings needing to persist regardless of which device the user switched to.
- Initiated and developed the platform's official website from scratch using **Next.js**, **TypeScript, Sanity CMS**, and **Tailwind**, based on **Figma** designs.
- Implemented interactive walkthroughs using **Material UI** and **Tailwind**, as well as dynamic forms that improved the user experience and helped new users get started.

Developer – Flaivy Nation AB, Stockholm (fixed-term employment)
September 2024 – November 2024

- Built a customizable translation system in **Next.js** and **PostgreSQL** to prepare the platform for a smooth launch in additional languages.
- Troubleshot complex issues with state management and API responses, which eliminated rendering bugs and resulted in stable operation across the entire application.

EDUCATION

Introduction to Programming in Python – University of Gävle, *September 2025 – January 2026*

Frontend Development – Medieinstitutet, Bromma, *September 2023 – May 2025*

Preschool Teacher Education Programme – Stockholm University, *September 2016 – January 2020*

Technology Programme, Design & Product Development – Danderyd Gymnasium, *August 2012 – June 2015*
