PROFILE

When I code, I like to keep things simple. I split the UI into clean, reusable components, keep my logic short and readable, organize everything in folders, like services, hooks, context or utils. I'm a big fan of structure and keeping my projects organized.

I mostly work with React, Next.js, and TypeScript, and I enjoy building apps that are fast and responsive. I try not to overcomplicate state management, adding local state where it makes sense, shared state with context or custom hooks when needed.

I'm still learning more about CI/CD and testing, learn quickly and enjoy figuring stuff out. I'm not the finished product (who is?), but I'm curious, committed, and I really care about writing good code and being part of a good team.

If any of this sounds interesting, reach out. I'd love to chat and tell you more about what I can do, and know more about your work.

SKILLS

Languages & Technologies: HTML, CSS, Sass, Tailwind, JavaScript, TypeScript, C#, Python

Frameworks & Libraries: React, React Hooks and Router, Next.js, Vue, Flask, Node.js, Vite, Material UI, NextAuth, Framer Motion

Databases: MySQL, MongoDB, Prisma ORM, Mongoose ODM, DBeaver

Testing: Jest, Cypress

CMS: Sanity CMS

Tools: Figma, Git, GitHub, GitHub Actions, Workflows, Vercel, Postman, npm, babel, vite, Zod, Joi

Other: UX/Usability, RESTful API, Agile work, CI/CD, state management

Soft Skills: Communication, Leadership, Active Listening, Pedagogical Ability, Team Player

Languages: Swedish (native), English (fluent), Spanish (fluent)

WORK EXPERIENCE

Frontend Developer – Appears, Botkyrka (Temporary employment alongside studies)

January 2025 – April 2025

Helped build the company's new CMS "Sabina AI" and developed its official website from scratch using Next.js, Sanity, and Tailwind. I handled databases, API integrations, debugging, and backend connections.

Frontend Developer – Flaivy Nation AB, Stockholm (Temporary employment alongside studies)

September 2024 – November 2024

Developed a translation system using microservices and contributed to the company's code generator "clay". Worked with Next.js, Redux, Moleculer, and wrote tests using Jest following TDD principles.

Resource Educator – Olovslund School, Järfälla

March 2023 – December 2024

Supported students with special needs. Introduced routines, visual aids, and used TAKK for communication. Also assisted in other classrooms.

Preschool Teacher & Team Coordinator – Påfågeln Preschool, Solna

January 2020 – February 2023

Responsible for educational content and coordinating daily operations. Implemented special education strategies and TAKK. Also in charge of procurement.

EDUCATION

Frontend Development – Medieinstitutet, Bromma

September 2023 – May 2025

Studies in HTML, CSS, JavaScript, TypeScript, API development, React, Vue, UX/Usability, and more.

Bachelor of Education in Early Childhood – Stockholm University

September 2016 – January 2020

Studies in subject didactics, special education, and TAKK (sign-supported communication).

Technology Program, Design & Product Development – Danderyd High School

August 2012 – June 2015

Courses in Design, CAD, Web Development, and Product Development.
