Nicolas Carrasco

Frontend developer

Driven frontend developer with a passion for creativity, problem-solving, and modern design. Seeking my first role in the industry where I can grow and develop, especially within backend and database management.

Work experience

2025 - Ongoing

Junior frontend developer (Internship 2) - Appears, Botkyrka

- I am working on building the company's new CMS 'Sabina AI' and developing its website from scratch using Next.js, Sanity CMS, and Tailwind.
- My responsibilities include managing databases and integrating between frontend and backend. I also work with API management and troubleshooting.

2024

Junior frontend developer (Internship 1) - Flaivy Nation

AB, Stockholm

- My task was to create a system to translate Flaivy's CMS via a 'microservice' and their own code generator 'clay'.
- I worked with Next.js, Moleculer Microservices, and conducted code tests with Jest (Test Driven Development).

2023 - Ongoing (On the side of my studies)

Childcare worker and teaching assistant, Olovslundsskolan, Järfälla

- Assisted a student in need of support during the school day.
- Introduced clear routines for the student using visual aids.
- Used AAC (Alternative and Augmentative Communication) to support the student's communication.
- Later became a part-time employee as studies began.

2020 - 2023

Preschool teacher, Påfågeln preschool, Solna

- Taught and was responsible for the curriculum content in a preschool department.
- Took on the role of coordinator, which involved responsibility for the daily operations of the preschool, including staff organization, routines, and substitute management.
- Implemented special education teaching for children in need of support, using visual aids and AAC (Alternative and Augmentative Communication).
- Also held the role of purchasing manager.

● **2018 - 2019**

Substitute, Påfågeln preschool, Solna

- Worked in various departments alongside my studies before securing a permanent position as a preschool teacher.

● **2015 - 2017**

Substitute, Rösjöskolan, Sollentuna

- Assisted students with neurodevelopmental disorders (NPF) in the school's preparatory department. I also guided the students with motor and cognitive training.
- Assisted teachers with teaching in various grade levels during staff shortages.

Education

● **2023 - 2025**

Frontend development - Medieinstitutet, Bromma

- The education included HTML, CSS, JavaScript, TypeScript, API development, React, Vue, graphic interfaces, and UX/Usability, among other topics.

● **2016 - 2020**

Preschool Teacher Program - Stockholm university, Stockholm

- Studied subject didactics, which focuses on teaching and learning in theory and practice. Also studied various school subjects such as language, among others.
- Studied special education to work with students in need of support and with neurodevelopmental disorders (NPF). I also developed knowledge in AAC (Augmentative and Alternative Communication).

● **2012 - 2015**

Technology, specialization in design and product development - Danderyd High School, Danderyd

- Studied Design 1 and 2, where I learned to understand and manage product development from idea to finished product.
- Studied Web Development 1, CAD 1 and 2 (3D modeling).
